

## Ironmongery Specification Services Sub-Saharan Africa

Precision. Compliance. Confidence.

### WHO WE ARE

**Ironmongery Specification Services - SSA** is a specialist consultancy focused on providing accurate, project-ready Architectural Ironmongery Schedules and Product Specifications.

### WHAT WE DO

We partner with various distributors to offer solutions to Architects, Developers, Quantity Surveyors, and even Contractors to ensure every door on a project meets the required functionality, compliance, security, and aesthetic standards.

With deep industry knowledge and brand-agnostic expertise, we evaluate project requirements and develop complete ironmongery schedules, including hardware selection, certification compatibility, fire-rating alignment, and even access-control integration.

***Our goal is to remove uncertainty, reduce procurement delays, and support smooth project delivery from design through to installation.***

Whether you're working on Commercial Buildings, Healthcare, Hospitality, Student Accommodation, Residential Developments, or Specialised Facilities (like psychiatric patient areas or data centres), **Ironmongery Specification Services-SSA** ensures the correct hardware is selected the first time — with full technical documentation to support tender, approval, and procurement.

We don't sell products. We sell certainty.

*NOTE: We are **Guild of Architectural Ironmongers (GAI)** qualified professionals, so you will be working with professionals that are fully up to date with the latest European legislation, industry standards and products.*
